Student ID _____

Basic Program	Credit Hours	Complete	In Progress	Still Needed	Comments
EMS 131 Emergency Medical Technician	6				

Course provides fundamental knowledge about emergency medical procedures and techniques. These include artificial respiration, cardio-pulmonary resuscitation, control of bleeding, splinting, extrication and light rescue, and ten hours of hospital training and observation to give Emergency Medical Technicians improved clinical knowledge of the profession. Successful completion of EMS 131, with a grade of "C" or better, qualifies the student to take the Department of Health Services State Certification examination for EMT-Basic.

Intermediate Program*	Credit Hours	Complete	In Progress	Still Needed	Comments
EMS 233 Intermediate Emergency Medical Technician	18				

Prerequisite: Current State Emergency Medical Technician-Basic Certificate; One year experience in emergency medical services as a certified EMT-Basic; Written and oral exams.

*The Intermediate Emergency Medical Technician (EMT) Certificate (EMS 233) provides advanced levels of pre-hospital emergency medical care. The program provides training in the areas of advanced life support techniques and procedures, patient assessment, and care and management of emergencies. Advanced emergency medical procedures and techniques are taught based on human anatomy and physiology, medical terminology, pharmacology, intravenous therapy and drug administration. Students receive related training in rescue/extrication techniques and communication/reporting. The course is state certified and is open to individuals, at least 18 years of age, who are current, state certified EMT's. Upon satisfactory completion of this two-semester sequence, students will receive a verification of completion and become eligible to take the State certification examination as prescribed by the Arizona Department of Health Services.
