YAVAPAI COLLEGE:

STRATEGIC VISION

STUDENT PROGRESS AND OUTCOMES REPORT

2014

www.yc.edu
EXECUTIVE SUMMARY

In 2011, Arizona’s community colleges embarked upon a long-term Strategic Vision to significantly increase the number of Arizonans who achieve their postsecondary education and training goals, complete a degree or certificate, and/or transfer to a university. In order to measure progress toward the three major goals outlined in the Strategic Vision, the colleges have implemented a rigorous self-assessment and accountability process centered around the annual collection and distribution of data related to 30 key indicators.

Data presented in the 2014 Strategic Vision Student Progress and Outcomes Report, some of which are highlighted below, identify areas of strength, as well as places where Yavapai College will need to focus its efforts in order to improve student access, retention, and completion. For some of the retention and completion measures, a specific group of students called the “Credential-Seeking Cohort” was tracked; this group is defined as full- and part-time learners who earned at least 12 credit hours by the end of their second year. Tracking this sub-cohort aligns Yavapai College’s data collection and accountability strategies with those of national community college initiatives such as the Voluntary Framework of Accountability. Furthermore, analysis of retention and completion outcomes within this sub-cohort provides a more accurate gauge of community college student success, as it takes into account learners’ diverse educational and training goals.

The 2014 outcomes presented in this report can be compared to those from 2012 and 2013. However, additional data points are necessary before definitive statements about trends in community college student progress and success can be made.

HIGHLIGHTS OF YAVAPAI COLLEGE’S 2014 STUDENT PROGRESS AND OUTCOMES REPORT

Access
• Yavapai College’s multiple course delivery methods meet the diverse needs of the region’s students; 56 percent of student credit hours are earned in alternative times, places, and/or methods (online or hybrid-delivery, for example).
• Yavapai’s net price of attendance is 13 percent of the county’s median household income, making it an affordable and quality option for higher education in Yavapai County.

Retention
• Yavapai College retains 94 percent of credential-seeking learners from fall to spring semesters, and 76 percent to the following fall.

Completion
• At Yavapai, more than 7 in 10 credential-seeking students achieve a successful outcome within six years.
• More than one-third of Yavapai College students transfer to a four-year college or university. This is higher than a comparable national transfer rate of 25 percent.
ARIZONA COMMUNITY COLLEGES: LONG-TERM STRATEGIC VISION

In 2011 Arizona’s community colleges published a long-term strategic plan, which has since been incorporated into strategic planning processes at community colleges across the state. This plan outlined a clear vision for Arizona’s ten community college districts and identified 30 key indicators of progress toward 3 major goal areas: access, retention, and completion. Many of these indicators are aligned with those included in the American Association for Community Colleges’ Voluntary Framework of Accountability (VFA) initiative, which will allow for comparisons with national norms in years to come.

A major function of the Strategic Vision is the collection, analysis, and publication of data pertaining to the 30 key indicators of progress, as well as the sharing of best practices and successful program models across the state. This document is the third in a series of annual reports providing data related to student progress and outcomes at Yavapai College. Where available, comparable statewide and national data are also shown.

2012 was the first full year of Strategic Vision data collection. As such, the 2014 outcomes presented in this document can be compared to those from the previous two years, although additional data points are necessary before definitive statements about trends in student progress and outcomes can be made.

However, these data provide a snapshot of areas where Yavapai College is successfully serving students, as well as those areas where further improvement is needed. The data included in this report will also enable Yavapai College to set reasonable benchmarks for attainment related to core metrics in coming years.

The Strategic Vision, as well as a Technical Guide that provides detailed definitions of each key indicator of progress, can be found online at: www.arizonacommunitycolleges.org.

OUR VISION: Arizona’s community colleges, through a collaborative effort with education, business, and community partners, will significantly increase the number of Arizonans who achieve their postsecondary education and training goals, complete a degree or certificate, and/or transfer to a university.
Indicator 1. Full-time student equivalent (FTSE) enrollment

Following the statewide trend, annual full-time student equivalent (FTSE) enrollment at Yavapai College has declined slightly from its high of 4,205 in 2010-11. These enrollment numbers likely reflect a greater number of students enrolling directly in the state’s universities and/or private institutions, as well as an improved economy drawing more students into the workplace.

Indicator 2. Enrollment of underserved populations

In 2012-13, 58 percent of Yavapai College students were adults over the age of 24. This number is substantially higher than the statewide average (statewide averages in this figure are represented by red lines) and indicates Yavapai’s emphasis on workforce training and retraining.

As well, 31 percent of 2012-13 Yavapai students were Pell recipients and 6 percent were members of an underserved racial or ethnic groups. The latter number is substantially lower than the percentage of those populations in Yavapai County (17 percent).¹

Indicator 3. Percent of student credit hours earned via alternative delivery methods and/or at alternative times and places

At Yavapai College, 44 percent of instruction in 2012-13 occurred in traditional semester-length classes held on campus, Monday through Friday, between the hours of 8am and 5pm.

Extending access to many diverse populations, 56 percent of all student credit hours were earned online, at night or on the weekends, in short-term courses, and on American Indian reservations.

Indicators 4-5. Community college-going rate and overall college-going rate

In 2012-13, Yavapai College enrolled 25 percent of all recent high school graduates from the college’s service area. The decline in recent years mirrors the statewide trend.

Although not shown on the graph, Arizona’s community colleges and universities together enroll 58 percent of all recent high school graduates.²

Indicators 6-7. Success after remediation

After six years, 39 percent of developmental math learners in Yavapai’s 2007 New Student Cohort successfully completed a college-level course in math, and 46 percent of all developmental English/reading or reading learners in the same cohort completed a college-level English course.

Yavapai College’s success after remediation rates have increased in recent years, and those in developmental math exceed the statewide average (statewide averages in this figure are represented by red lines).

Indicator 8. Cost of attendance as a percentage of Arizona median household income

At just over $5,700 per year, the net price of attending Yavapai College is 13 percent of the median household income in Yavapai County, making the institution an excellent and affordable option for postsecondary education and training.

Yavapai College’s net price is reported by the National Center for Education Statistics and is based on new full-time students.

Indicators 9-10. Course success rates

Over two years, 55 percent of student credit hours attempted in developmental courses by Yavapai’s 2011 New Student Cohort were successfully completed (with a grade of A, B, C, or Pass).

In that same time period, 81 percent of student credit hours attempted in college-level courses by Yavapai’s 2011 New Student Cohort were successfully completed (with a grade of A, B, C, or Pass).

Although developmental course success rates have declined slightly in recent years, college-level course success rates exceed statewide averages (represented by red lines).

Indicator 11. Percent of gateway (first college-level) math and English credit hours successfully completed

In 2012-13, between 71 and 85 percent of student credit hours attempted in College Algebra, English Composition I and II, and Speech were successfully completed (with a grade of A, B, C, or Pass).

Yavapai’s gateway course success rates have risen in recent years and meet or exceed statewide averages (represented in this figure by red lines).
Indicator 12. Percent of full-time learners completing 42 credits and percent of part-time learners completing 24 credits within two years

By the end of their second year, 42 percent of full-time learners in Yavapai’s 2011 Credential-Seeking Cohort had completed 42 credits, and 55 percent of all part-time learners in the same cohort had completed 24 credits. These rates are similar to statewide averages (represented in this figure by red lines).

Although there is room for improvement, these rates are notable, as research has linked attainment of credit thresholds (roughly equivalent to 20 credits per year for full-time students) to higher retention and completion rates.

Indicators 13-14. Retention rates

Ninety-four percent of learners in Yavapai’s 2011 Credential-Seeking Cohort (excluding those who successfully transferred and/or earned a degree or certificate) persisted at their college to spring 2012, and 76 percent of them returned for classes the following fall. These retention rates meet or exceed statewide averages (represented in this figure by red lines).

Yavapai’s retention figures are substantially higher than the 53 percent fall-to-fall retention rate reported as a national comparison, as the national number is not limited to credential-seekers. However, national community college accountability initiatives such as the Voluntary Framework of Accountability are beginning to track and analyze retention among credential-seeking sub-cohorts, and thus more accurate national comparisons should be available in future years.
Indicator 15. Percent of learners achieving their stated education or training goals

This indicator is in development. It will be incorporated into the Strategic Vision once enough time has passed to link intent to completion data.

Indicator 16. Number of degrees and certificates awarded

In 2012-13, Yavapai College awarded 805 degrees and certificates.

Of the 2012-13 total, 60 percent were degrees, and 40 percent were certificates. These numbers reflect a concerted effort by Yavapai College to increase the number of learners earning postsecondary credentials, especially in high-demand fields.

Indicator 17. Degree/certificate completion rate (graduation rate)

After six years, 35 percent of Yavapai’s 2007 Credential-Seeking Cohort had completed a degree or certificate.

Yavapai College’s graduation rate is higher than both the statewide average and the 25 percent reported as a national comparison. However, the national number is not limited to credential-seekers. Nonetheless, the Voluntary Framework of Accountability is beginning to track and analyze completion among credential-seeking sub-cohorts, and thus more accurate national comparisons should be available in future years.

Indicators 18-20. Number of in-state university transfers, and percent with an AGEC and/or degree at time of transfer

Between 2009-10 and 2012-13, the number of students transferring from Yavapai College to an in-state, public university increased by 14 percent. Additionally, the percentage of those transfers who had earned an AGEC and/or degree prior to transfer has remained high, at 61 percent. These data indicate that the transfer process is becoming more efficient and cost effective for both students and the state.

Indicator 18. AGEC completion rate

Twenty-five percent of Yavapai’s 2007 Credential-Seeking Cohort completed the Arizona General Education Curriculum (AGEC) within 6 years. This rate is substantially higher than that for the state.

Increasing AGEC completion rates—a key priority for all of Arizona’s community colleges—will not only ease transfer to Arizona’s public universities but should help to improve bachelor’s degree completion in the state.

Indicators 21-22. In-state and overall transfer rates

Yavapai’s transfer rates among ASSIST “transfer behavior cohorts” has remained steady at 25 percent (the 2006-07 cohort is the most recent for which ASSIST data are available). Yavapai’s overall rate of transfer (the percent of learners in the 2007-08 credential-seeking cohort who transferred to any four-year college or university within 6 years) is substantially higher, indicating that a considerable number of Yavapai students transfer to private and out-of-state institutions. Both rates are similar to or higher than the most recent national transfer rate (25 percent) calculated by the Center for the Study of Community Colleges. 6

6Center for the Study of Community Colleges. (2002). National transfer rates are up! Results of the 2001 Transfer Assembly Project. Los Angeles: Author.
**Indicator 23. Percent of learners achieving a successful community college outcome**

Seventy-seven percent of learners in Yavapai’s 2007 Credential-Seeking Cohort achieved a successful outcome within 6 years.

Because community college learners enter college with diverse education and training goals, and because they often attend part-time and/or earn credits from more than one community college, the Voluntary Framework of Accountability and other national accountability initiatives have broadened the definition of a successful community college outcome to include: earning a degree or certificate; transferring to another two- or four-year college or university; continued enrollment; and/or leaving the institution after earning 30 or more credits.

**Indicator 24. Percent of full-time transfers to Arizona public universities who earn a bachelor’s degree within four years**

Sixty-one percent of all 2009-10 full-time transfers from Yavapai College to in-state universities earned a bachelor’s degree within four years. Though lower than the statewide average, this rate indicates that most full-time transfers from Yavapai College are graduating from the state’s public universities in a timely manner.

**Indicator 25. Percent of all transfers who earn a bachelor’s degree within 4 years**

Forty-one percent of 2009-10 transfers from Yavapai College to all four-year institutions—public and private, in-state and out—earned a bachelor’s degree within four years. This rate is lower those for the state and the nation (60 percent) and may reflect a high incidence of part-time attendance after transfer.

---

Indicator 26. Percent of occupational program completers/leavers earning an industry-recognized credential within one year

Out of all learners in Yavapai’s 2010-11 Occupational Completers/Leavers Cohort who took a technical skill or end-of-program assessment aligned with industry-recognized standards up to one year after college exit, 99 percent passed the assessment and/or earned an industry-recognized credential. This level of performance exceeds the 2010-11 national average of 83 percent.8

Examples of occupational programs leading to industry-recognized credentials include, among others, aviation technology, building and construction, dental hygiene, education, emergency medical technician, fashion, fire science, nursing, solar technologies, and veterinary technologies.

Indicator 27. Percent of occupational program completers employed with a livable wage and/or enrolled in further education within one year

This indicator is in development. It will be incorporated into the Strategic Vision once adjustments have been made to account for disparities in wages across various community college service areas.

Indicator 28. Percent of Adult Basic Education (ABE) and General Educational Development (GED) Learners Entering Employment

In 2012-13, all of Yavapai College’s ABE/GED learners who were not employed at the time of entry entered employment within three months of exiting the program.

This number is substantially higher than the 2012-13 national average,9 indicating that Yavapai College is effectively moving ABE/GED learners into the workforce.

---

Indicator 30. Percent of adults with postsecondary experience and/or degrees

Nearly 40 percent of Yavapai County adults age 25 and older have attended some college and/or have earned an associate degree. This rate exceeds both the statewide (34 percent) and national (29 percent) averages.

Twenty-four percent of adults in Yavapai County hold a bachelor’s or higher degree. By continuing to provide education leading to transfer and bachelor’s degrees, and by partnering with the state’s public universities, Yavapai College and other community colleges across the state will endeavor to help the Arizona Board of Regents reach their goal of raising the percentage of Arizona adults holding a bachelor’s degree to 28 percent by 2017.

Indicator 29. Percent of Adult Basic Education (ABE) and General Educational Development (GED) Learners Entering Postsecondary Education

In 2012-13, 95 percent of Yavapai’s ABE/GED completers who held a GED or high school diploma, or who enrolled in a class specifically designed for transitioning to postsecondary education, subsequently enrolled in further education within one year of program exit.

This number is substantially higher than the 2012-13 national average, indicating that Yavapai College is effectively moving ABE/GED learners into higher education.
