THE FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT

WHAT IS FERPA?

FERPA is a federal regulation that deals specifically with the education records of students who attend a post-secondary institution, such as Yavapai College. It provides the following rights to the student:

- Right to inspect and review education records
- Right to seek to amend education records
- Right to have some control over the disclosure of information from educational records

WHAT DOES THIS MEAN FOR PARENTS?

Because FERPA regulates that the student has primary ownership over their respective educational records, the Office of Residence Life cannot speak to parents about specific student information including personal information, account balances, grades, transcripts, class schedules etc.

FERPA TIPS FOR STUDENTS AND PARENTS...

- Support your student in being proactive and involved in their educational decisions and responsibilities by teaching them to take the lead
- Students may choose to complete a "Consent for Release" form, granting permission to a person other than the student to obtain student financial aid information and records. This form is located in their MyYC login >Students>My Financial Aid>Consent Forms> "Yavapai College Student Consent for Access". Students can cancel consent at any time.
