

## Computed Tomography and Magnetic Resonance Certificate Programs Overview

The **Computed Tomography (CT) certificate program** is comprised of two courses designed as facilitated and self-directed learning for radiologic professionals (post-primary) who are established and presently employed in the field. The program, which can be completed in one semester, offers both didactic coursework and clinical-skills experiences necessary to prepare the student to challenge the American Registry of Radiologic Technologists (ARRT) Post-Primary Certification Examination in Computed Tomography.

The **Magnetic Resonance (MR) certificate program** is comprised of two courses designed as facilitated and self-directed learning for radiologic professionals (post-primary)

who are established and presently employed in the field. The program, which can be completed in one semester, offers both didactic coursework and clinical skills experiences necessary to prepare the student to challenge the ARRT Post-Primary Certification Examination in Magnetic Resonance Imaging.

*The programs are designed around a model of classroom/online instruction integrated with hands-on experience in a clinical setting that provides an educational foundation and a professional preparation to enter the workforce as an entry level practitioner upon graduation.*

The CT and MR certificate programs are demanding and involve clinical and classroom/online instruction coursework. Students must maintain a minimum 2.5 GPA in the program courses to remain in the program, and must be adequately prepared to meet the challenge and establish priorities prior to the start of classes.

The CT and MR certificate programs are accredited by the Higher Learning Commission of the North Central Association of Colleges and Universities.

Graduates of the programs are eligible to:

- Receive a certificate in either Computed Tomography or Magnetic Resonance.
- Challenge the ARRT Post-Primary Certification Examination in Computed Tomography or Magnetic Resonance Imaging.
